ABOUT ME

A computer engineer who is also a philospher managing being the bridge between social relations and technical crew.

EDUCATION

2017- 2020• Koç University
B.A. Computer Engineering (Double Major)

2013- 2020• Koç University
B.A. Philosophy

EXPERIENCE

JUN 2020 – AUG 2020

Engine200
Freelance Software Developer
- Developed two full stack web applications and one slackbot using Javascript, ExpressJS and ReactJS.
- First application is to generate names for the custom projects using an English dictionary and generating names based on the user preferences (length, combination type, including strings, thesaurus).
- Second application finds similar places nearby when a place in an area is searched. Google Places API used. It generates a graph to show which type of places are more common with their average distances to the searched place.
- Datadog tracing added to the second application to trace the API requests.

NOV 2018 – FEB 2020

L'oréal Turkey
IT Employee Experience Intern
- Worked with all employees to enhance their IT Experience
- Managed the migration of the corporate files from local servers to cloud servers and completed 50% of the departments.
- Organized trainings for the employees on how to use digital tools on their team works.
- Completed the corporate transformation on digital technologies.
- Assisting Turkey branch of the global project called "Digital Workplace" and training new champions.
- Organized IT Focus Groups for all the departments and categorize their problems into IT teams and generated reports and timelines based on the IT crew feedbacks.

NOV 2018 – FEB 2020

Yapı ve Kredi Bankası A.Ş.
CRM Software Development Summer Intern
- Designing and writing a program in order to make a comparison on two excel files and print out the missing datas using SQL, Java and JDBC.
- This program is used by CRM Software Development team.Research project is completed on how to migrate NoSQL Cassandra database systems from SQL.

| SEP 2017 – JAN 2018 | **Koç University Artificial Intelligent Laboratory** |
| | Research Assistant |

- Collecting data from the experiments given.
- Eye tracking software and hardware are used.
- Research to make a correlation between the user's hearing and perception. Hearing a sentence, the points that user looks at detected and map generated.

SKILLS
