# MELIKE KAVCIOĞLU

## SOFTWARE ENGINEER

Hello, my name is Melike and I am a software developer.
My career purpose is to live every work-day to reflect my values: learning, developing, and sharing.

## EXPERIENCE

### Software Engineer
Vodafone Turkey | Sept. 2020 - Current
- Designed and developed a user friendly control panel website for the marketplace project.
- Supporting category managers and helping the panel users with technical problems.
- Developed web services for the panel to reduce workload for the co-operating teams.
- Java Spring Boot and Angular JS frameworks are used to develop backend and frontend services, respectfully.

### Freelance Software Developer
Engine200 | June 2020 - August 2020
This was a freelance job and I was the only web developer for the projects. They were birilliant for me to start-up my career, and fruitful developing.
- Developed two full stack web applications and one slackbot using Javascript, ExpressJS and ReactJS
- Used Google Places API to suggest similar places in a given radius.
- Used datadog to trace the requests.

### IT Employee Experience Intern
L'oréal Turkey | Nov 2018 - Feb 2020
This intern included working every department in L'oréal to understand their IT requirements and supply tranings and tools to meet their needs.
- Managed the migration of the corporate files from local servers to cloud servers to increase co-operation.
- Organized IT Focus Groups for all the departments and categorize their problems into IT teams.
- Assisting Turkey branch of the global project called "Digital Workplace" and training new champions
